	◇ Wayne State University	Sep 2007 – Aug 2010
	B.Sc., Computer Science	

EXPERIENCE	◇ Director and Co-founder – Modellicty , Toronto, ON	Jan 2018 – Present
	– Built probability-of-default models and software solutions for clients in the credit risk space.	
	– Lead software engineer in developing <i>Modellicty Wizard</i> ; a software product that streamlines the process of model development for the financial sector.	
	◇ Software Engineer – UnitaryFund , New York, NY	Jan 2020 – Present
	– Co-developer of <i>metriq</i> ; an online platform built using React, Javascript, and Postgres where users can upload and compare against state-of-the-art quantum computing benchmarking results.	
	◇ Software Engineer – ISARA , Waterloo, ON	May 2017 – 2021
	– Developed company's first correctness testing suite for NIST-approved post-quantum cryptographic protocols. This process involved either finding, or developing from scratch (in Python), third party implementations of these algorithms to compare against our internal implementations.	
	– Developed an internal testing suite for ISARA's <i>OpenSSL Connector</i> ; an enhanced version of OpenSSL that is patched with various post-quantum cryptographic primitives.	
	◇ Graduate Researcher – University of Waterloo , Waterloo, ON	Sep 2012 – Feb 2017
	– Contributor to <i>QETLAB</i> ; a software package used to study theoretical aspects of quantum computing. Software has been cited in numerous scientific publications.	
	◇ Software Engineer, Consultant – SkyWatch , Kitchener, ON	Sep 2016 – Oct 2016
	– Developed back-end data acquisition and processing service using Python, MySQL, and AWS resulting in an API service.	
	◇ Software Engineer, Intern – Raytheon BBN Technologies , Cambridge, MA	May 2012 – Sep 2012
	– Contributed to the development of <i>QuaFL</i> ; a statically typed domain specific language to study quantum computing using Python.	
	◇ Research Assistant – Wayne State University , Detroit, MI	Nov 2010 – Jan 2012
	– Contributed to development of <i>GOMC</i> ; a GPU-driven open-source Monte Carlo simulation engine written in C++ that uses the CUDA library. Our software yields a 29 times faster implementation than an optimized serial CPU-driven code.	
	◇ Software Engineer – Wayne State University , Detroit, MI	Nov 2010 – Nov 2011
	– Developed a web client in PHP and Python to interface with mobile devices that tracked and stored data from several hundred patients in a MySQL database. Software has been cited in peer-reviewed work.	
	◇ Software Engineer, Intern – University of Michigan , Ann Arbor, MI	May 2010 – Sep 2010
	– Processed several hundred gigabytes of data sent back from spacecraft. Used IDL, C++, and Python to perform analysis and data visualization for internal reports.	
	– Solved an issue unresolved by NASA engineers by analyzing anomalous data sent back from spacecraft. Presented an oral and written report of work to department.
